MEL DATABASES

www.mel.org

Databases within MeL have many book reviews, interviews, and critical articles related to nursing and healthcare.

Many of the Library's subscriptions are indexed so that students can find articles; other periodicals are available full text.

We recommend starting with Health Reference Center Academic

Gale Group Databases

- *Health Reference Center Academic (HRCA)*: Provides the full text of many articles.
- *Health and Wellness Resource Center*: Includes information related to alternative health.
- *InfoTrac OneFile*: Full text for many topics.

OCLC First Search Databases

- *CINAHL*: A cumulative index to nursing and allied health. Minimal articles available in full text.
- *MEDLINE*: Covers all areas of medicine including dentistry and nursing.
- *WilsonSelect Plus*: Full text for many topics.

PERIODICALS-- PHYSICAL LOCATION

- **Current Issues**: Recent issues of periodicals are located on the far west wall of the Library. They are arranged in alphabetical order by title. The most recent issue is on top of the shelf. Other current issues are located directly under the shelves. Lift up the shelf to see these.
- **Back Issues**: Issues of periodicals older than six months to a year are arranged alphabetically and located at the end of the Reference section.
- **Microfilm**: Microfilm is located in an alcove behind the Media Desk.

NURSING PERIODICALS IN THE GOCC LIBRARY
